SUMMARY

I am an experienced Web Developer and DevOps Professional with a passion for web development and cloud computing. I have a strong foundation in both front-end and back-end technologies. I am well-versed in cloud computing platforms and use cloud services to create scalable and robust solutions. I am dedicated to lifelong learning and remaining current on industry trends, offering a dynamic and adaptive approach to every project I work on

EXPERIENCE

Jr Technical Azure Consultant

Mapping Skills Technology Pvt. Ltd

March 2024- September 2023

- Engineered a cloud migration strategy for a mid-sized company, enabling the transition of over 30 applications to Azure within a 6-month timeframe, and reduced operational costs by 20% through effective resource allocation and automation scripts.
- Help senior consultants create, deploy, and manage cloud solutions with Microsoft Azure tools and services.
- Diagnose and resolve technical issues with Azure security, apps, and infrastructure. Work with stakeholders and clients to identify and meet their company's objectives and goals.
- To enhance the functionality and effectiveness of cloud solutions, become knowledgeable about emerging technologies and industry best practices.
- Keep track of and inform the appropriate parties of the project's progress, status, and results.

JavaScript Developer

RanchiMall

June 2023 - September 2023

- JavaScript Development for Blockchain Product
- I created a real-time data visualization tool in JavaScript that processed and displayed complex datasets 50% faster than the previous solution, improving decision-making processes for cross-functional teams.

PROJECTS

Blackbaas

Blackbaas • <https://blackbaas.vercel.app> • January 2024 -March 2024

- This project is a Backend as a Service (BaaS) that provides a unified interface for integrating different services from various cloud providers, such as Google Cloud Platform (GCP), Microsoft Azure, and Amazon Web Services (AWS)

Alaric

Alaric • <https://alaric.co.in> • August 2022 - Present

- This web application aims to provide real-time information about the location of buses running in a city and to enable passengers to book and pay for tickets online. It will utilize an embedded system-based GPS module installed on each bus to capture and transmit the real-time location data to the server.

Themysticroutes

Themysticroutes • <https://themysticroutes.netlify.app> • August 2022 - December 2022

- TheMyticRoutes is a comprehensive online platform that streamlines the process of planning unforgettable hill station vacations. Our user-friendly website aims to cater to the diverse needs of travelers seeking to explore the breathtaking beauty and serenity of the hills.
